PROFESSIONAL SUMMARY

Detail-oriented Integrated M.Tech Software Engineering student at VIT Vellore with a strong academic foundation (9.24 CGPA) and hands-on exposure to modern frontend frameworks. Proficient in crafting interactive user journeys using React, TypeScript, and Tailwind CSS, coupled with robust object-oriented program logic. Adept at breaking down complex architectural workflows—from state-driven AI behavior profiles to secure role-based navigation loops—into clean, modular, and deployment-ready software components.

EDUCATION

Vellore Institute of Technology (VIT)

Integrated M.Tech in Software Engineering (CGPA: 9.24 / 10.00)

Vellore, India

Expected May 2029

Senthil Matric Higher Secondary School

Higher Secondary School Certificate (12th State Board) – 93.8%

Tamil Nadu, India

2024

Senthil Matric Higher Secondary School

Secondary School Leaving Certificate (10th State Board) – 96.6%

Tamil Nadu, India

2022

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, TypeScript, HTML/CSS

Frameworks & Libraries: React, Tailwind CSS

Developer Tools: Git, GitHub, VS Code, MATLAB

Core Competencies: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Software Architecture, Agile Methodologies

TECHNICAL PROJECTS

KEBO – Character-Driven AI Companion App | React, TypeScript, Tailwind CSS, Git

- Developed a highly responsive web interface facilitating fluid conversational interactions, conversational memory routing, and relationship score indicators.
- Built decoupled React modular layout components to seamlessly display dynamic emotional states, detailed logging parameters, and individual preference configurations.
- Modeled conditional logic algorithms simulating autonomous agent responses, managing application state updates for user relationship progressions.
- Utilized rapid prototyping best practices to continuously deploy structural modifications to front-end layout arrays without breaking core functional systems.

ReSourceX – Surplus Resource Exchange Platform | HTML5, CSS3, JavaScript (ES6), Git

- Designed and launched an end-to-end responsive web ecosystem mapped specifically to balance local surplus supply lines with high-priority community requests.
- Engineered decoupled user permission tiers containing unique visual dashboards and form validations for Donors, Recipients, and Platform Administrators.
- Programmed complex client-side search indexing parameters, logical sorting filters, and reactive layouts to help recipients filter location data seamlessly.
- Maintained active technical ownership across dynamic Agile feature releases, translating strict structural constraints into highly performant browser elements.

CERTIFICATIONS & WORKSHOPS

IBM Data Analytics Professional Certification – Offered via BharatCares from AICTE.

Data Science using MATLAB – Value Added Course completed at VIT Vellore.

AI Engineering Workshop Certification – Specialized seminar tracking generative concepts managed by BSERC.
